DETAILED ACTION

Examiner's Amendment

1. Authorization for this Examiner's amendment was given in a telephonic interview with Thomas Felger on October 3, 2005.

1. Cancel claims 42-48

Allowable Subject Matter

1. Claims 51-75 are allowed.

2. The following is an examiner's statement of reasons for allowance: independent claims 51 and 65 teach at least first and second application controllers interfacing with first and second beverage dispensing machines and/or controllers, respectively, an application host communicating with the controllers via a LAN, WAN and/or network operations center to receive data, the applications operable to autoconfigure the LAN, a first and second transceiver to relay data from the first beverage dispensing devices or controllers to the host, and the network operations center forwarding data to the beverage dispensing devices.

3. The closest prior art of record, Defosse, Barrett, Ote, Stapp, Mostafa and Farris, do not teach data communications to and from a beverage dispensing machine. Therefore, independent claims 51 and 65 are allowable over the prior art.

4. Claims 52-74, and 66-75 are allowed by the same rational as well as the further limitations added by these dependent claims.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
